

# Insert boxes – conquering chaos and complexity

Our insert boxes put an end to the chaos that would otherwise be common in many a warehouse and workshop. They are the product of choice when it comes to safely storing and organising small parts. They are suitable for insertion in boxes, drawers and containers alike, providing a home for diverse items. What's more, they help you to make maximum use of the space within your containers.

Our robust insert boxes are versatile and practically indestructible. Available in countless versions, they are resistant to the majority of oils, acids and alkalis, and their smooth interiors make them easy to clean. Moreover, because every item is in its rightful place, you waste no time tracking them down.
